

On a monthly basis, the monetary aggregate M3 declined by 0.4 percent, after rising 0.9 percent the previous month, reaching 968.2 billion dirhams. This change is primarily the result of the 0.9 percent drop in claims on the private sector and, in particular, the 2 percent decline in the claims of depository corporations on private nonfinancial corporations. Indeed, cash advances and equipment loans to these companies fell by 1.4 percent and 1.5 percent, respectively, and factoring receivables shrank from 6.9 to 3.6 billion dirhams. Net foreign assets registered a decrease of 1.5 percent, as the net foreign assets of Bank Al-Maghrib were down 1.1 percent and those of banks 15.3 percent. In contrast, net claims on the central government increased by 2.3 percent, mainly due to the 3 percent rise in Treasury bills held by banks.

The decline in money supply caused the contraction of bank money by 0.5 percent, time deposits with banks by 0.8 percent and money market fund shares by 6.9 percent. However, currency in circulation and savings accounts were up 0.7 percent and 1 percent, respectively.

Year on year, the pace of growth in M3 decelerated to 2.6 percent from 5.3 percent in March 2012. This trend primarily reflects the decline of 12.5 percent in money market fund shares, after a rise of 15 percent, and slowing growth of currency in circulation from 7.2 to 3.8 percent and demand deposits with banks from 7.4 to 1.5 percent. On the opposite, time deposits marked increase by 3.2 percent after declining by 4.7 percent.

By institutional sector, the change in M3 is due to the decrease in the monetary assets of private nonfinancial corporations by 7.7 percent, after a rise of 3.5 percent, and the slowing growth of assets held by households from 6.4 to 4.9 percent. In contrast, the monetary assets of state corporations increased by 11 percent, after falling by 7.5 percent in March 2012.

Regarding the counterparts of M3, net foreign assets continued to fall, down 11.8 percent from 14.8 percent in March 2012, while the growth in net claims on the central government slowed from 40 to 26.5 percent. Similarly, claims on the private sector decelerated from 7.6 to 2.1 percent, as bank credit slowed from 8.6 to 2.1 percent.

By economic purpose, equipment loans moved down by 1.3 percent after rising 2.3 percent, while real estate loans and cash advances slowed from 8 percent and 16 percent to 7.1 percent and 0.9 percent, respectively.

By institutional sector, the growth rate of loans to the private sector decelerated from 6.3 to 3.6 percent, concealing a slowdown in loans to private nonfinancial corporations from 6.3 to 0.7 percent and an acceleration of loans to households from 6.7 to 8.1 percent. Loans to state nonfinancial corporations fell by 0.9 percent.

By sector, the slowdown in bank credit includes a decrease of 2.1 percent in the industrial sector, 5.6 percent in trade and 7.3 percent in financial activities, as well as a deceleration from 9.9 to 2.8 percent in the construction sector and from 18.1 to 11.2 percent in the electricity, gas and water industry.

Concerning the claims of other financial corporations on nonfinancial institutional sectors, loans from finance companies slowed from 7.5 to 4.6 percent, as consumer loans to households fell by 4 percent and leasing to private corporations slowed from 6.7 to 2.2 percent. Loans from offshore banks rose by 6.4 percent after declining 14.3 percent in March 2012, mostly due to higher equipment loans to private corporations, which have almost doubled in 2013. Securities issued by nonfinancial corporations and held by non-money market funds showed a decline from 18.5 to 7.8 percent in March 2013.
