Publication of the annual report of the Moroccan SMEs Observatory

Casablanca, November 02nd, 2023

The Moroccan SMEs Observatory published the 2021 -2022 edition of its annual report. This report presents a set of indicators and analyses of the demographic, economic, and financial situation of the enterprises, in a context marked by successive economic crisis, including the covid 19 and the war in Ukraine.

This fourth edition includes new analyses dedicated to the employment by gender, wage, and enterprises access to bank financing according to the manager gender.

Furthermore, in response to numerous requests from both national and international institutions, the Observatory contributed to studies and projects related to SME segment.

The report also presents a mid-term review of its 2021-2023 strategic plan. It highlights the continuous progress of its expertise and capabilities to enhance studies and analysis while exploring new issues related to the national productive fabric.

Furthermore, The OMTPME had responded to requests from various institutions, both at the national and international levels, to contribute to studies and projects related to SME segment.

About the Observatory :

The Observatory is entrusted with the main mission of providing the public and private sectors with statistical indicators about SMEs and conducting general and thematic studies about these enterprises.
