

## PRESS RELEASE

### **Bank Al-Maghrib and the International Finance Corporation (IFC) Sign a Partnership to Promote Agricultural Financial Inclusion in Morocco**

**Rabat, June 18, 2025**

Bank Al-Maghrib and the International Finance Corporation (IFC) signed, on Wednesday, June 18 in Rabat, a partnership framework aimed at promoting agricultural financial inclusion. This partnership reflects the shared ambition of both institutions to promote an innovative financing model to meet the financial needs of small farmers and agricultural value chains. The agreement thus contributes to Morocco's national objectives for agricultural financial inclusion and the 2030 food security program.

The scope of this partnership includes AgTech (agricultural technology) in Morocco. This fast-growing sector contributes to the modernization of agricultural practices through the use of advanced technologies.

By combining resources, experience, and expertise, the partnership will enable farmers to access tailored financial services, supported by AgTech solutions that integrate technical advice, value chain relationship management, and financial inclusion. The joint objective of this partnership is twofold: to enhance the resilience of agricultural operations and to promote inclusive and sustainable growth.

The agreement focuses on mobilizing and supporting stakeholders in the financial ecosystem, developing new approaches for better use of agricultural sector data, and raising awareness among farmers about available financing options, ensuring they are equipped with the tools needed to make right decisions.
